# G·E·M·I·N·I TILES

ceramic wall & floor tile collection

## Key

-  Wall tile
-  Floor tile
-  Porcelain tile
-  Polished Porcelain tile
-  Glazed Porcelain tile
-  Glass tile
-  Rectified tile
-  Natural Product
-  Residential "bare foot" traffic
-  Internal residential kitchens & hallways
-  Kitchens & hallways with external access
-  Areas with heavy pedestrian use over sustained but not necessarily commercial applications
-  Frost Proof

\*For more details on each key please see Guidelines on pages 163-164

Range shown: Midi, see page 36

### Low Dust Technology

- Reduces dust released into the air during opening, pouring & mixing
- More comfortable for the tile fixer to use
- Saves time as less clearing up required

### Easy to use

- Excellent flowing and self-smoothing properties
- Mix with 5L of water per 25kg bag

### Flexibility

- Suitable for use with heated floors
- Can be used to reinforce wooden floors prior to tiling

Contact Weber on **08703 330070**  
or visit our website **www.netweber.co.uk**

### Features & Benefits

- Rapid-setting (light foot traffic after 2-4 hours)
- Can be built up to 50mm
- Fibre-modified for increased resilience
- Excellent bond to difficult substrates
- Suitable for covering with most flooring materials

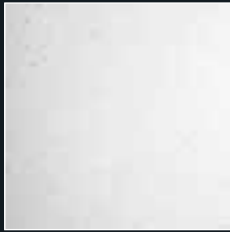

*Another breath of fresh air*

Showerwall is the ultimate, easy-to-fit waterproof panelling system that will enhance any bathroom or wet-room area. Showerwall has a tough hardwearing surface that is resistant to stains, easy-to-clean and also ultra hygienic. Available in a broad spectrum of colour and size combinations to suit all requirements, Showerwall is designed and manufactured to achieve smooth, seamless, water-tight joints. When installed using the recommended fitting guide and accessories, Showerwall comes with a substantial 15 year guarantee. See Showerwall brochure for more details.

For sizes and availability please contact your local stockist.

## DEVI Underfloor Heating

Ever since the Romans invented Underfloor Heating, millions of people worldwide have benefited from luxurious warm floors. Underfloor Heating is a cost effective solution and adds the perfect finishing touch to your room. DEVI's range of Underfloor Heating is efficient to run at just 0.7p-1p per m<sup>2</sup> per hour and is manufactured to the highest European Standards. DEVI – The worlds leading Underfloor Heating Manufacturer and the preferred choice for professional tradesmen and DIY enthusiasts alike.

## DEVI<sup>mat</sup>

The world's best selling Underfloor Heating Mat is available in 100w for Timber Sub Floors, 150w for Concrete and 200w for high heat loss rooms such as conservatories. Easy to install and efficient to run DEVI<sup>mat</sup> is available in sizes from 1m<sup>2</sup>-12m<sup>2</sup>

## DEVI<sup>flex</sup> Loose Lay cable

If your room is small or has an irregular shape then DEVI can offer the DEVI<sup>flex</sup> Loose Lay cable range of products. Available in 100w for timber sub floors and 150w for concrete, DEVI<sup>flex</sup> comes in a wide range of sizes

## DEVI<sup>flex</sup> Direct Acting (DA) In-Screed cable

Suitable for installation in screed both indoor and outdoor, DEVI<sup>flex</sup> Direct Acting (DA) In-Screed Cables offer a cost effective solution whether you're building a new floor or driveway!

## DEVI<sup>dry</sup> Underfloor Heating for wood and carpet

DEVI<sup>dry</sup> is DEVI's unique 'click and plug' system for use under pre engineered wood, laminate and carpet. Designed for ease of use the DEVI<sup>dry</sup> underfloor heating is the world's first underfloor heating system that can be plugged in, making it a pure DIY product!

## DEVI<sup>reg</sup> Thermostats

From the most popular DEVI<sup>reg</sup> 550 programmable thermostat to the DEVI<sup>reg</sup> 130 manual thermostat, DEVI offers a wide range of thermostats to suit all applications and styles.

## DEVI<sup>link</sup> Multiroom Control system

The world's most advanced Underfloor Heating controller, only from DEVI! Simply install a DEVI<sup>link</sup> Central Controller and a wireless Floor Thermostat and you can control your floor temperature from anywhere in the house. DEVI<sup>link</sup> uses Microsoft software for total reliability.

## DEVI Bathroom solutions

DEVI offer the complete solution when refurbishing your bathroom, from steam free mirrors with our DEVI<sup>clear</sup> and DEVI<sup>foil</sup> solutions and heated towelrails with DEVI<sup>rail</sup>. Add the finishing touch to your bathroom project!

## DEVI FLOOR GUARD

Unlike most other manufacturers DEVI offer a full 10 year FloorGuard warranty. In the unlikely event that the cables have a manufacturing fault DEVI will repair and replace if necessary the Heating and the Floor Covering under the warranty.

## DEVI Technical

DEVI offer full technical backup both before and after sales. Simply contact our technical department if you need advice or have plans that require working out.

## DEVI Map Planner

If you want to create your own underfloor heating system at the touch of a button, simply go to [www.devi.co.uk](http://www.devi.co.uk) and click on the map planner logo. You will get the full product listing and heating system layout.

# Raychem®

Wrap yourself in a beautifully warm floor

Installed in the bathroom, kitchen, and other rooms in your home, a beautiful warm floor provides a wonder touch of affordable luxury.

Raychem offers the most efficient, flexible, and fast acting solutions for your comfort. Wrap yourself in the luxurious warmth of a Raychem heated floor.

It really suits you.

## Raychem undertile heating solutions

Raychem floor heating systems provide economical, user friendly and comfortable warm floors, adding a touch of luxury to your tiled floor. The extensive Raychem range offers both:

- 90W/m<sup>2</sup> and 160W/m<sup>2</sup> heating mat solutions
- Robust and durable heating cable solutions for all shapes of room
- Advanced programmable control

The provider of the highest quality products, Raychem offers a 12 year "Total Care" warranty for complete peace of mind.

The floor heating that suits you.

## What can you expect from Raychem?

A total range of solutions and services from Raychem:

- The most economical solution with running costs as little as **1p per day / m<sup>2</sup>**.
- The most comprehensive warranty available in the UK. The Raychem 12 Year "Total Care" warranty covers the product in the event of failure, but also the cost of fault finding, rectification and the replacement of the tiled floor should it be necessary. No other warranty comes close.
- A complete system and installation **design service FREE OF CHARGE**. Simply send us a sketch of your floor area and we will provide you with a complete bill of materials and installation drawings in 2D and 3D.
- As a complete system provider, your Raychem floor heating system is controlled by a programmable thermostat allowing economical control and smart energy usage in line with current building regulations.

Wedi Building Boards can be used almost without limits thanks to the wide range of thicknesses and installation options to virtually any substructure.

Wedi Building Boards are light weight, waterproof and dimensionally stable. The ability to combine multiple installation options means Wedi Building Boards provide fast simple construction procedures whether they are fixed direct to existing tile coverings, on load bearing or non-load bearing substructures or in providing a smooth transition to traditional materials, finishes or details.

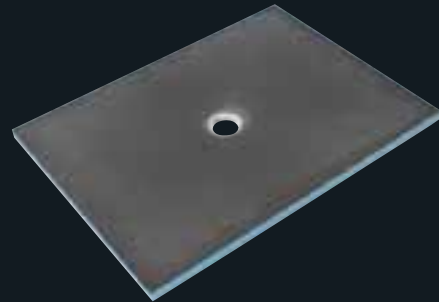

## Building Board Premium

- Now with taper edge and smooth finish
- Ideal for finishes such as mosaic, wallpaper, paint, render etc.
- For all wall, floor and ceiling applications in living areas and wet rooms
- Reversible (one side smooth, one sided grid structured finish)
- The perfect background for large format tiles
- Water-impermeable rigid foam
- Extremely lightweight and easy to work
- High insulation values and assured protection against mould
- Tried and tested wedi quality for over 25 years

# Shower Tray Range

- Our brand-leading Fundo range of walk in shower bases has been extended with two styles of linear drainage solution.
- The Riolito offers end-position linear drainage, while the Riofino (pictured) provides central linear drainage.
- Both offer designers and end-users contemporary and stylish drainage. Water drains away through a narrow gap between the solid stainless steel cover plate and the adjacent tiles – no fussy slits, gratings or holes!
- Riofino and Riolito offer three different styles of drain cover, in brushed stainless steel, extra thick brushed stainless steel or a tileable version.
- Both are available in a wide range of sizes, with channel lengths of 300mm for Riofino and from 700mm to 1100mm for the Riolito and with a 48 litre/minute capacity drain in the horizontal format or 60 litre/ minute in vertical type.

BAL, the leading brand of professional tiling adhesives and grouts, offers an unrivalled range of products for all tiling applications. It is the preferred choice of professional tile fixers, contractors and specifiers.

Whatever the tile material, background or function of the tiled environment, a BAL solution can be trusted for quality and lasting performance.

### Waterproofing Kit for Showers

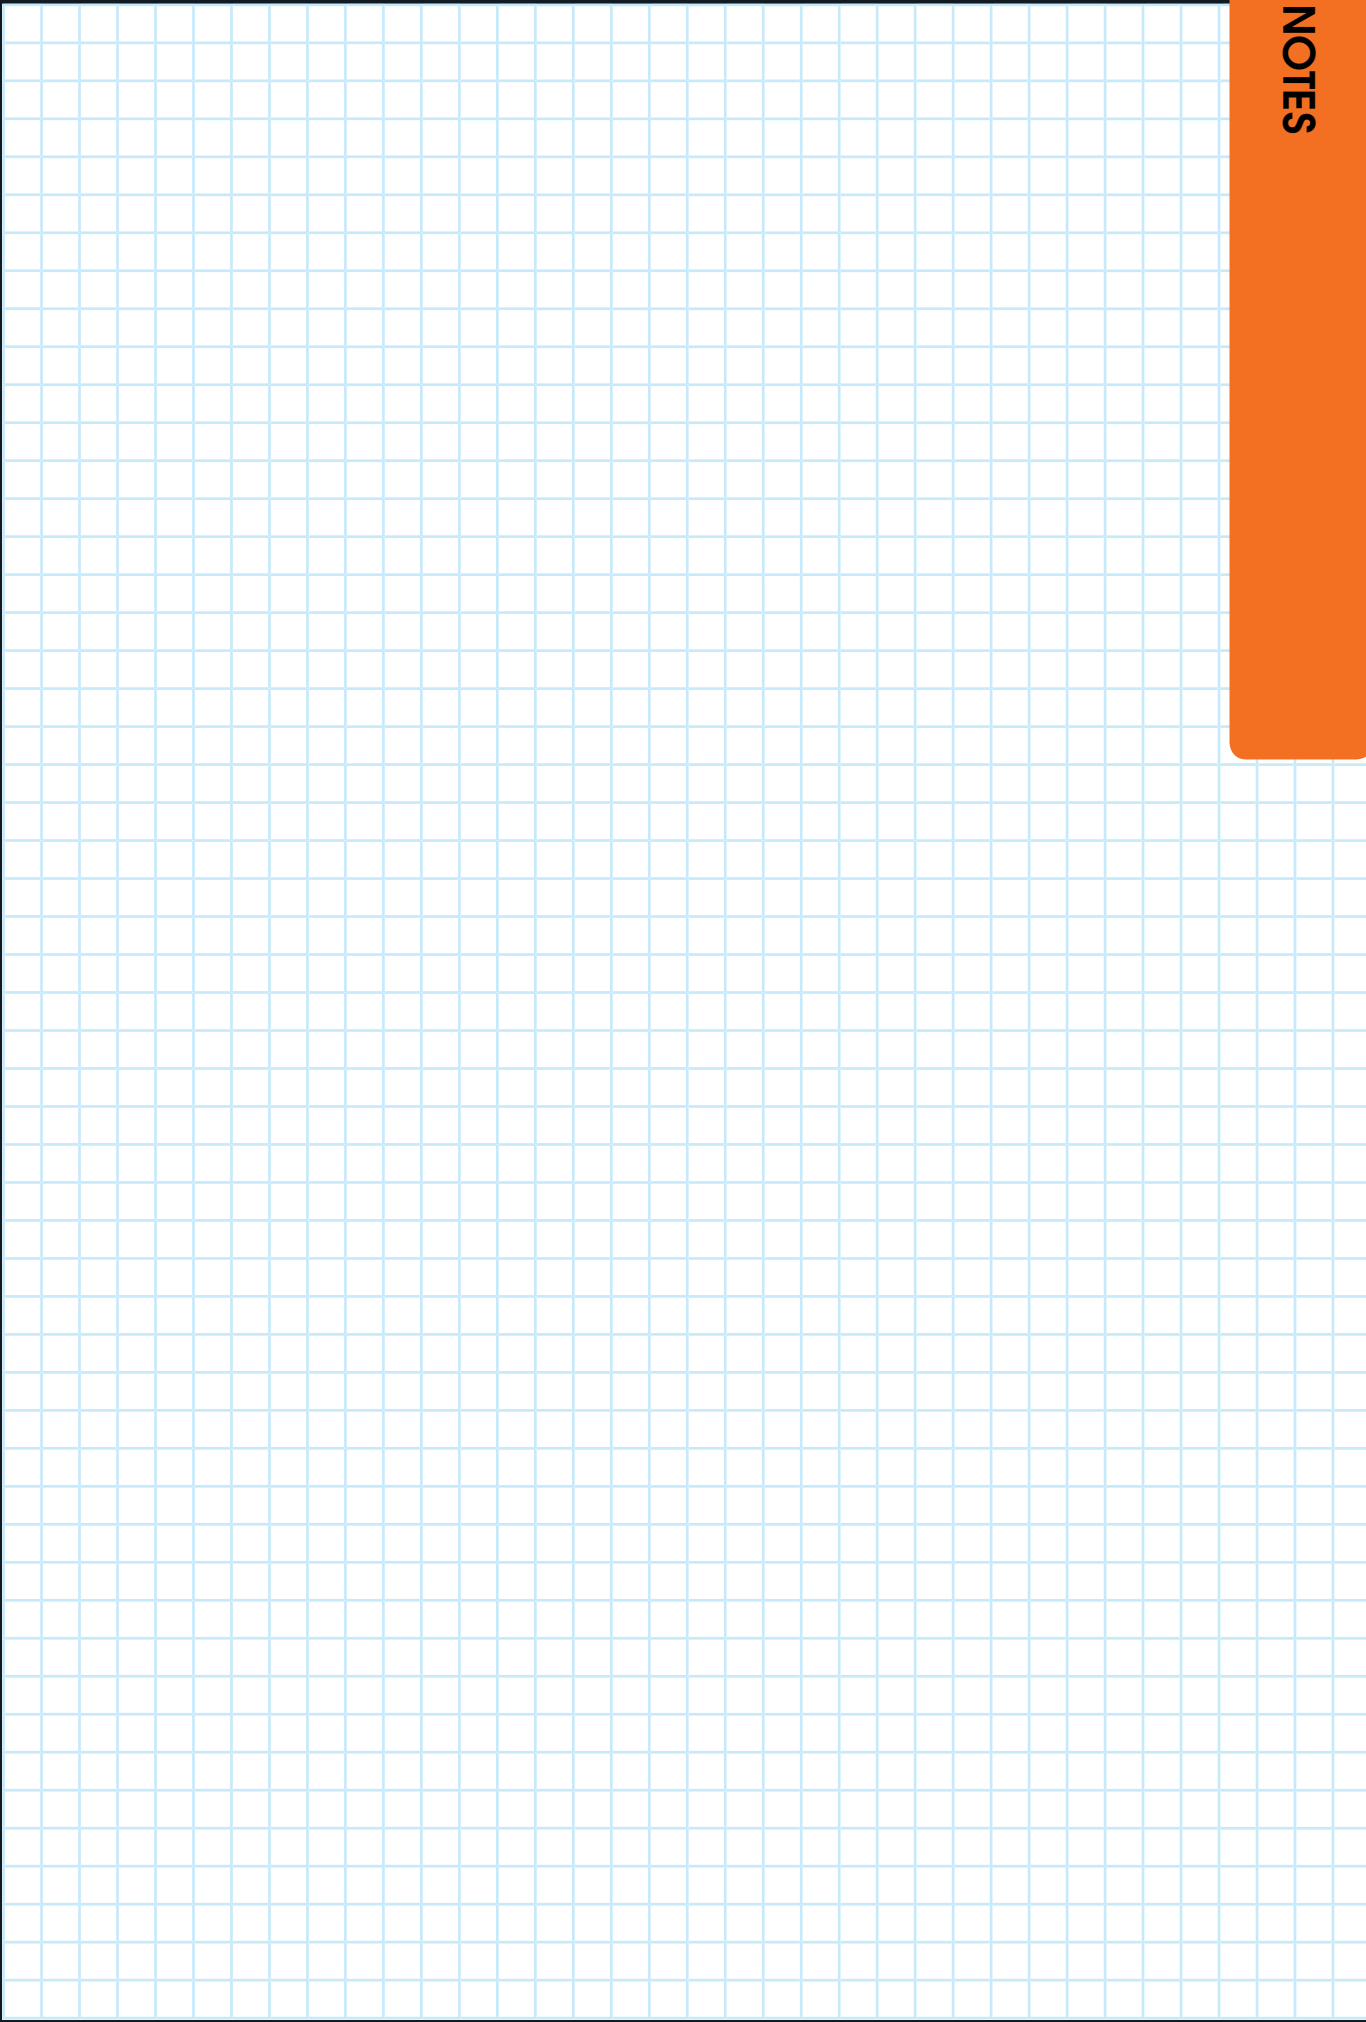

To guarantee the life of your shower or wetroom use BAL's waterproofing kit. Over time continued exposure to water may damage the plaster or plasterboard behind the tiles causing the background to deteriorate. This leads to the formation of black mould and may even result in tiles lifting from the walls. Ultimately water leakage could damage the fabric of your home. For complete peace of mind BAL's Waterproofing Kit for Showers contains everything required to fully waterproof a shower.

### Pro-hygiene systems

In areas where hygiene is important such as bathrooms, showers and kitchens, choose a product from the unique BAL pro-hygiene systems range. BAL microflex and micromax grouts, together with our sealants and cleaners, provide a market leading range, formulated with Microban® antibacterial protection to inhibit the growth of bacteria and black mould.

For all technical or product enquiries please contact the technical enquiry service Tel: 0845 6001 222

**Ceramic tiles\***

Currently this is the most common type of tile and may be supplied in either glazed or unglazed finishes. Ceramic tiles possess specific technical properties and a glaze coating that physically and hygienically protects the tiles. The base is clay based and porous; bucket cement is normally used to fix these tiles. They are used internally on walls and floors. In general the floor tiles are thicker hence stronger, as they carry weight and more traffic. Cutting is via scoring the ceramic surface and then by snapping using pressure. Tile cutters are readily available. Tiles are available in many different sizes and thicknesses. Designs and colours can be applied during the firing of the tile, making these a very common and adaptable internal tile.

**P****Porcelain Tiles\***

Porcelain tiles are very durable, low porosity tiles suitable for indoor and outdoor installations for domestic and commercial applications. They can be fitted to walls and floors however always check to ensure that the wall can bear the weight of these tiles. Always fix porcelain tiles using cement based adhesive an example is BAL Single Part Flexible. Plaster board and plaster walls must be primed before fixing for example using BAL primer APD. As an extremely hard material cutting can be a problem, for best results cut these tiles with diamond bladed wet saw. Due to their very low absorbency (Vitrified or fully Vitrified) porcelain tiles do not normally require sealing. Polished tiles however have a slight degree of microporosity as a result of the polishing process. If used in areas subject to a high level of spillage, polished tiles can be sealed to further protect. Matt tiles can also be sealed in high-risk areas, e.g. light coloured tiles on commercial kitchen floors.

**GP****Glazed Porcelain\***

Porcelain tiles with an opaque to transparent coating that have been fired to the tile biscuit. This type of tile has a vitreous covering on the face of the tile, which is fluid impermeable.

**PP****Polished Porcelain Tiles\***

Shiny surface of un-glazed tiles, achieved by mechanical polishing at the final stage of production. We recommend sealing Polished Porcelain tiles for extra protection.

**G****Glass Mosaic\***

Glass Mosaics are suitable for walls in all internal installations and for domestic bathroom floors, where they will only be subject to light foot traffic. In some ranges a slip resistant 'Grip' finish is available for wet floors such as walk in showers.

Glass mosaics should always be fixed with white cement based adhesive, e.g. BAL Mosaic-Fix. For fixing to plaster and plaster board, the surface should be first primed with BAL primer APD or similar. Glass mosaics are supplied in sheets and when fixing the fabric mesh goes towards the wall, setting them in line to obtain a correct vertical and horizontal meeting of joints. Tap the surface of the mosaics with a rubber float to ensure adequate adhesion and flatness. Some glass mosaics may be supplied with brown paper sheets with or without a fabric mesh these are fixed in the same way, but with the brown paper facing out. When the adhesive has set, wet the paper thoroughly with a sponge and peel the paper off holding one corner. Please be aware that due to the translucent nature of glass mosaic, final colour and shade of the fixed material can vary especially depending on lighting and location.

**R****Rectified Tile\***

A rectified tile has been mechanically cut to size after the firing process. This process creates a precise edge and, as a result, can be laid with a tighter grout joint than an unrectified tile. Great care must be taken when fixing to ensure tiles are fixed flat and not lipped.

**Crazing**

A fine hairline cracking which sometimes appears on the glaze of the tile. This is usually caused by tensile stress between the tile biscuit and glaze. This may have been intentionally produced for artistic effect.

**Shade Variation**

It is common practise to check batch numbers on wallpaper. Please apply the same care before fixing tiles.

Shade variation is an inherent feature of some ceramics and it is therefore imperative that you visually check blends prior to fixing. Care should always be taken to ensure that sufficient tiles are purchased within the same batch to complete the job, as no claims for variations or quality can be entertained after fixing.

**PEI**

The construction and qualities of tiles differ greatly. One classification that influences / affects where to use specific tiles is Abrasion Resistance PEI ratings.

Abrasion Resistance – Below are four different classifications.

- 2** Residential “bare foot” traffic.
- 3** Internal residential kitchens and hallways.
- 4** Kitchens and hallways with external access.
- 5** Areas with heavy pedestrian use over sustained periods but not necessarily commercial applications.

Please note: We would recommend the use of a door mat within a mat well to all external doors.

**Frost Proof Tiles**

Tiles specifically designed by the manufacturer to withstand freezing/thaw conditions. Hence suitable for exterior applications exposed to the elements, high humidity and very low temperatures.

**Natural Products\* General Fixing Guidance**

Before purchasing your stone, please check that it is suitable for the application you wish to use it for.

- Surfaces must be clean, dry, sound and free of contamination.
- Wet areas such as showers should be tanked with BAL WPI Shower Kit or Tanking System prior to tiling.
- All stone is porous to some degree and must be sealed with the appropriate LITHOFIN product PRIOR TO GROUTING. This will protect the stone from being stained by any pigment in the grout and from grout being sucked into the stone by capillary action.
- Use the solid bed fixing method incorporating an appropriate notched trowel and fill any voids in the back of the tile. When fixing to skimmed plaster or gypsum plasterboard, prime prior to tiling with BAL PRIME APD.
- Ideally fix natural stone with a rapid setting cement based adhesive. Due to the porosity of certain stones, staining can occur if a normal setting adhesive is used. White adhesive should always be used with pale stones and when using a light coloured grout. Either BAL RAPID SET WHITE OR BAL RAPID SET FLEXIBLE (if background is prone to movement) are suitable adhesives for most backgrounds on floors and walls. It is recommended that BAL FAST FLEX is used for overlaid timber floors to minimise any chance of movement damage.
- Grouting of stone can be done in the same way as any other tile. In the case of Travertine an extra quantity should be allowed for to fill the voids in the stone. Standard cement based or polymer modified grouts, BAL WIDE JOINT GROUT, BAL SUPERFLEX, BAL MICROFLEX, or BAL MICROCOLOUR can all be used. Check to see which would be the most appropriate for your application. Ensure that any grout is removed from the surface before sealing by washing the floor / wall with a dilute solution of LITHOFIN POWER CLEAN.
- Further sealing will be required after grouting as stone can stain. On most occasions this is due to an inadequate amount of sealer being applied during the fixing process and the tiles not being fully sealed. Properly sealed stone is easier to maintain.
- Please note that it is not recommended that you clean most stone with ordinary household detergents as they are acidic and can damage most stone.
